EXPERIENCE

Freelance Web Developer

August 2017 - Current

- Work with business owners and other stakeholders to define and implement requirements for more scalable and optimized applications.
- Experienced in managing content marketing campaigns and providing actionable SEO audits.
- Produce effective graphics, sales copy, and other content as required.

EDUCATION

Columbus State University

Computer Science

August 2016 - December 2019

PROJECTS

Contidly

Main Website, Web App | <https://contidly.com>

- Implemented a user authentication flow with tiered services using Netlify Identity and Stripe's API.
- Developed a serverless function for crawling user submitted websites - auditing each page in the process.
- Developed and implemented user dashboards with dynamic filtering and search options.

Pathlight

Main Website, Web App | <https://pathlight.dev> | <https://github.com/codygriffith/pathlight>

- Highly scalable serverless application for auditing webpages using Google Chrome Lighthouse.
- Uses AWS SAM to allocate the application's functions, API, and databases under a single, versioned deployment.
