Cody Griffith

EXPERIENCE

Freelance Web Designer
August 2017 - November 2019

- Updated and built client websites in a variety of tools, languages, and platforms

- Efficiently self-managed projects and client relationships.

- Developed graphics, copy, and other required content.

EDUCATION

Columbus State University
Computer Science
August 2016 - December 2019

PROJECTS

Contidly
Main Website, Web App | https://contidly.com

- Developed and implemented the Sign-up flow and tiered user authentication for services using Stripe's API.

- Developed and implemented a serverless function for crawling, auditing, and scoring user submitted websites with the Google Page Speed Index API.

- Developed and implemented user dashboards with dynamic filtering and search options.

Pathlight
Main Website, Web App | https://pathlight.dev | https://github.com/codygriffith/pathlight

- Built a highly scalable serverless application for auditing webpages using Google Chrome Lighthouse.

- Uses AWS SAM to allocate the application's functions, API, and databases under a single, versioned deployment.

DataTables
Demo Website, Component Library | https://pathlight.dev | https://github.com/codygriffith/pathlight

- Built a highly scalable serverless application for auditing webpages using Google Chrome Lighthouse.

- Uses AWS SAM to allocate the application's functions, API, and databases under a single, versioned deployment.
