WORK EXPERIENCE

Alentheia Design Co.

Web Developer

June 2020 - Present

- Lead the development of client websites, ensuring high performance, security, and scalability.
- Worked closely with design teams to integrate user-centered design principles into development processes.
- Implemented and maintained web applications using modern frameworks and technologies.
- Optimized websites for search engines and improved overall site performance and accessibility.
- Provided ongoing technical support and updates for client websites, ensuring seamless operation.

Freelance Web Designer

August 2017 - June 2020

- Designed and developed custom websites for small businesses, focusing on responsive design and user experience.
- Collaborated with clients to create tailored web solutions, from concept to deployment.
- Managed all aspects of web design projects, including client communication, project timelines, and technical execution.
- Utilized HTML, CSS, JavaScript, and various content management systems to build and maintain websites.

EDUCATION

Columbus State University

Bachelor of Science in Computer Science

December 2019

PROJECTS

Cull-Pro | <https://cull-pro.com>

- Built a browser-based RAW culling app for photographers: keep or reject each frame with one keystroke, then deliver private client galleries.
- Decoded 40+ camera RAW formats on-device via LibRaw and WebAssembly.
- Shipped Supabase accounts and Stripe billing on Cloudflare Workers, with originals in S3-compatible object storage.

Pathlight | <https://pathlight.dev>

- Built a free website-audit tool running Google Lighthouse, with Core Web Vitals, SEO and accessibility reporting.
- Implemented user authentication and saved audit history.
- Added email report sharing and a stateless SVG audit badge, and served the prerendered React app from Cloudflare Workers.

SKILLS

- JavaScript, TypeScript, React, Next.js, SvelteKit, Tailwind CSS
- HTML, CSS, Cloudflare Workers, Supabase, Stripe, Git
- CI/CD, SEO, NGINX, Apache, Flask, Netlify
